## EILISH'S TIPS

SAT 10 min easy run or rest
You can't gain by training hard in the last week so the key is to stay fresh and get ready for event day.

A short run the day before the race will not tire you out or negatively impact your performance in any way. It helps by getting the muscles loose and the body prepared to run hard the following day.

Don't go off too fast, pace yourself and be proud of your achievements so far and enjoy your big day!
